

Muhammad Aun e Ali Mirza

DATA ENGINEER

+39 3896449602 | aunmirza50@gmail.com | Milan, Italy

PROFESSIONAL SUMMARY

Data Engineer with a Master's in Data Science, experienced in building scalable data pipelines, optimizing SQL/PLSQL workloads, and transforming raw operational data into reliable analytical assets. Skilled in ETL development, performance tuning, and automated reporting, with a strong foundation in statistical analysis and model evaluation to support forecasting and anomaly detection across enterprise operations.

CORE COMPETENCIES

- Data Pipeline Development
- ETL / ELT Engineering
- SQL & PL/SQL Optimization
- Data Modeling
- Python for Data Engineering
- Performance Tuning
- Data Quality & Validation
- Statistical Analysis
- Cross-Functional Collaboration

Surriya Textile Mills | Feb 2022-Sept 2022

Oracle Apex Developer

- Implemented enterprise data infrastructure by leading the full deployment of Oracle-based environments, including installation, configuration, and integration with existing databases to support scalable data workflows.
- Delivered operational data solutions for procurement and inventory by driving full-lifecycle development of backend data processes, building complex data-driven components, and automating system notifications to streamline information flow.
- Engineered and optimized PL/SQL data logic through robust procedures, functions, and views, improving data integrity and query performance using TOAD and SQL Developer for debugging, tuning, and optimization across large datasets.

Artistic Apparels | Sep 2019-Feb 2022

Oracle Application Consultant

- Supported enterprise data systems by managing L2/L3 operations for SQL/PLSQL-driven applications and backend workflows, ensuring high availability, rapid issue resolution, and stable data processing across business functions.
 - Integrated operational data flows by connecting application components with Oracle EBS modules (OM, BOM, PR, PO), enabling real-time synchronization and delivering role-based dashboards that improved visibility for procurement, inventory, and production teams.
 - Optimized SQL/PLSQL logic for dashboards and reporting pipelines, reducing data retrieval and report generation time by 30% through refined queries, indexing strategies, and improved data access patterns.
-

EDUCATION

MS In Data Science | 2022-2025

Universita Degli Studi Napoli Federico II, Italy

Bachelors In Software Engineering | 2015-2018

Sir Syed University of Engineering & Technology, Pakistan

Apple Developer Academy - Programme

Universita Degli Studi Napoli Federico II, Italy

SKILLS

- SQL & PL/SQL
- Data Modeling
- ETL / ELT Development
- Python for Data Engineering
- Database Systems
- Data Pipelines
- Performance Tuning
- Data Integration
- NLP & Machine Learning

THESIS / RESEARCH PROJECT

- Financial sentiment analysis using transformer-based NLP models (BERT, DistilBERT, GPT-3, and custom architecture) to classify market sentiment and improve predictive insight for financial decision-making.
- Developed custom transformer models and compared performance across pretrained architectures, optimizing accuracy through fine-tuning, feature engineering, and hyperparameter adjustments.
- Built end-to-end NLP pipelines for data collection, preprocessing, tokenization, model training, evaluation, and visualization of sentiment trends.

LANGUAGE

- English B2
- Italian A1

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
 - Oracle Certified Foundation Associate
-
